

Variant 2

This variant offers visually two apartment blocks connected by a glass passage, each containing five housing units. To prevent the passage from becoming a third volume, it is only two floors high so that the studio apartment in the eastern block is not connected to the lift in the western block. There's an on foot access at the ground floor level by a „bridge“ from the am Stettberg street on the southern side of the parcel. There are two apartments per block at this level, just like at the basement 1 level, while under the roof's curve, having a beautiful view of the valley, there's one studio apartment per block. Vehicles are parked at the basement 2 level, containing twelve parking spots (one is for people with disabilities), so it's possible to reshape this project's space to have an apartment per parking spot. Pines are supposed to be planted at this level, being that they are an important
